PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in developing real-world applications across AI, Web Development, and IoT domains. Built projects including a Retrieval-Augmented Generation (RAG) system and an RFID-based robotic solution, demonstrating strong problem-solving and software development capabilities. Passionate about designing scalable and efficient software systems that address real-world challenges.

SKILLS

Programming Languages: C++, Python, Java

Web Technologies: HTML, CSS, JavaScript

Backend & APIs: Flask, REST APIs

Databases: MySQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

Tools & Platforms: Git, GitHub, AWS, Arduino IDE, ThingSpeak

PROJECTS

Scalable Document Question Answering System (RAG) | *Backend & AI Developer* April 2026 - Present

- Developed a Retrieval-Augmented Generation (RAG) system for accurate document-based question answering.
- Implemented semantic search and vector retrieval to improve response relevance and scalability.

Technologies : Python, LangChain, FAISS, LLMs, APIs

Root Finder Web Application | *Full-Stack Developer* Jan 2026 - Mar 2026

- Developed a web application to solve numerical root-finding problems using multiple computational algorithms.
- Integrated interactive graph visualization and backend processing to enhance analytical insights and user experience.

Technologies : HTML, CSS, JavaScript, Flask, Plotly

Smart Robotic Waiter System (IoT + RFID) | *IoT Developer* Sep 2025 - Dec 2025

- Developed an autonomous robotic waiter system using RFID-based table identification and sensor-driven navigation.
- Implemented obstacle detection and order tracking to improve delivery efficiency.

Technologies : ESP32, RFID, IoT Sensors, Embedded Systems

Weather Forecast Web Application | *Frontend Developer* June 2025 - July 2025

- Developed a responsive web application to display real-time weather information using a Weather API.
- Implemented location-based search and dynamic UI updates to enhance user experience.

Technologies : HTML, CSS, JavaScript, Weather APIs

EXPERIENCE

Web Development Intern (Remote) | *Pinnacle Labs Pvt. Ltd.* June 2025 - July 2025

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript.
- Built a Weather Forecast Web Application with location-based search while optimizing user experience and cross-device compatibility.

Technologies / Skills Used : HTML, CSS, JavaScript, GitHub

EDUCATION

Chandigarh University Aug 2023 - Present

B.E. in Computer Science Engineering

CGPA : 7.92

Sunbeam School

2022 - 2023

Intermediate (CBSE)

Percentage : 68.40%

St. Francis School

2020 - 2021

Matriculation (CBSE)

Percentage : 93.40%

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2025)
- Data Structures & Algorithms — Infosys Springboard (2025)
- Database & SQL — Infosys Springboard (2025)
- Full Stack Development — Chandigarh University (2025)

LANGUAGES

- English
- Hindi
